Agriculture Innovation Day - Tintinara

To register please message Tracey SMS on 0427 750 050 or E: tstrugnell@coorong.sa.gov.au

Wednesday 12th June
1.15pm - 7.30pm

Attend the whole workshop, or drop in for the session that interests you

Afternoon tea and evening meal provided

PROGRAM INCLUDES  more info over page

- Seasonal Climate Drivers & Outlook
- Producer enterprise shift in response to changed rainfall patterns
- Managing risk & decision making on farm
- The role of Multi Peril Crop Insurance
- Using technology to identify soil constraints
- Unlocking sandy soil production potential
- What is new with farm remote technologies?
- Enhanced Abattoir Surveillance Reports explained

TRADE DISPLAYS & INFORMATION

This project is supported by the Australian Government’s Region Land Partnerships initiative of the National Landcare Program and South East Natural Resources Management Board levy funding
# AG INNOVATION UPDATE PROGRAM

**Tinintara Memorial Hall, Wed 12th June 1.15pm – 7.30pm**

## CLIMATE - ON FARM RESPONSE – MANAGING RISK

<table>
<thead>

</table>
| 1.30 pm| Dale Grey                                                                   | Seasonal Climate Drivers & Outlook  
|        | AG Innovation Update Program                                                 | Bringing weather to life through the Fast Break e-newsletter & YouTube Channel                                               |
|        | Steve Hobbs                                                                 | Changes in rainfall patterns & driving enterprise change  
|        | Mixed Farming Enterprise – Kaniva                                             | - Building Soil Carbon  
|        |                                                                              | - Use of Electronic Ear Tags  
|        |                                                                              | - Producing Biodiesel on farm  
|        |                                                                              | - Energy in the farm cycle                                                  |
| 2.10 pm| Cam Nicholson                                                               | Managing risk & decision making in farm business  
|        | Livestock Producer & Ag Consultant                                          | Temperament & personality in decision making  
|        | GRDC Grain & Graze Program, Nicon Rural Services                            | Mixed farming analysis                                                       |
| 2.50 pm| Chris Matthews – MGA Insurance                                              | Why Agricultural Risk is uninsurable in Australia  
|        |                                                                              | The role of Multi Peril Crop Insurance                                       |

## SOIL INNOVATION – MAPPING TO BOOST PRODUCTION

<table>
<thead>
<tr>
<th>Time</th>
<th>Speaker(s)</th>
<th>Topic</th>
</tr>
</thead>
</table>
| 4.50 pm| Felicity Turner – Independent Adviser                                       | Use of technology to identify soil production constraints  
|        |                                                                              | EM Mapping, Veris Mapping, NDVI & Yield Mapping  
|        |                                                                              | What do the maps look like & what do they tell us?                                                                         |
| 5.35 pm| Mel Fraser – Senior Soil Consultant                                         | Unlocking production potential on sandy soils  
|        | PIRSA – Rural Solutions                                                     | Matching soil constraint to soil treatment to boost production  
|        |                                                                              | Do I rip, spade, clay, lime, tailor nutrient & trace element applications?                                                     |

## REMOTE TECHNOLOGIES

<table>
<thead>
<tr>
<th>Time</th>
<th>Speaker(s)</th>
<th>Topic</th>
</tr>
</thead>
</table>
| 6.20 pm| Shane Oster - Alpha Group                                                    | Remote Technologies  
|        |                                                                              | What’s new, what’s on the horizon?  
|        |                                                                              | - Soil Moisture Probes  
|        |                                                                              | - Weather Stations  
|        |                                                                              | - Leak Detection Units  
|        |                                                                              | - Tank Monitoring                                                   |

## ENHANCED ABATTOIR SURVEILLANCE PROGRAM

<table>
<thead>
<tr>
<th>Time</th>
<th>Speaker(s)</th>
<th>Topic</th>
</tr>
</thead>
</table>
| 6.55 pm| Allison Crawley – Veterinary Officer                                        | Enhanced Abattoir Surveillance Program  
|        | Biosecurity SA Animal Health                                                | What animal health conditions are picked up in EAS?  
|        |                                                                              | What is the livestock production change this could drive?                                                                   |
