### 1. Purpose

The purpose of this policy is to guide the sustainable management and protection of Council’s asset portfolio to ensure compliance to legislative requirements and that services and infrastructure are provided in a sustainable manner with appropriate levels of service to residents, visitors and the environment.

The application of this policy will ensure adequate provisions are made for the long-term replacement of assets, including physical assets by implementing appropriate asset management strategies and providing appropriate financial resources for those assets.

Council will adopt the following principles:

- Assets will be managed using a “life-cycle cost” approach and in accordance with best practice asset management techniques.
- Assets will be utilised to achieve their fullest potential to maximise usage and economic performance.

## ***Asset Management Policy***

- The asset portfolio will be continually monitored and reviewed to ensure it is responsive to service delivery requirements in terms of community needs and expectations.
- Assets will be properly maintained to ensure they continue to function effectively for the duration of their economic life.
- Funding for the purchase, maintenance, rehabilitation and replacement of all assets will be guided by Council's Asset Management Plans and included in the annual Business Plan and Budget and Long-Term Financial Plan.
- Exposure to risk is managed through the application of sound operational principles and practices.
- Legislative and regulatory requirements are met.

## **2. Policy Objectives**

Council is responsible for providing services to the community through the provision of assets under its care and control. Council has a responsibility to manage its assets to ensure cost effective delivery of its services based on sound Asset Management principles.

Council will acquire, dispose and optimise the use of these assets to ensure that the overall asset base meets appropriate service standards for the current day while still maintaining generational equity into the future.

This policy will be implemented across all Council sites (ie. works depots) and applies to the creation, acquisition, operation, maintenance, rehabilitation and disposal of all Council assets including but not limited to:

- Road and transport infrastructure (roads, kerbs, footpaths)
- Buildings and community facilities (building, open space, sports and recreation, marine)
- Water and wastewater infrastructure
- Stormwater assets
- Plant and fleet

Council will develop and maintain:

- Detailed **asset registers** of all assets owned or under Council's control
- An organisational **Asset Management Strategy**
- **Infrastructure & Asset Management Plans** for all categories
- Alignment with and contribution to Council's **Long Term Financial Plan**
- **Asset Operational and Maintenance Plans** based on service levels
- Intervention and **Service Standards** based on sound risk management principles

## **Asset Management Policy**

### **3. Definitions**

**“Asset”**: is a resource controlled by an entity as a result of past events; and from which future economic benefits are expected to flow to the entity.

**“Asset Management”**: the combination of management, financial, economic, engineering and other practices applied to physical assets with the objective of providing the required service level in the most cost effective manner.

**“Asset Register”**: is a record of assets including information such as construction, technical and accounting details about each.

**“Asset Renewal Funding Ratio”**: is the ratio of net capital expenditure on the renewal and replacement of existing assets and excludes new capital expenditure on the acquisition of additional assets.

**“Economic Life”**: is the period between acquisition of the asset and the time when the asset while physically able to provide a service, ceases to be the lowest cost alternative to satisfy a particular need.

**“Lifecycle Cost”**: is the total cost of an asset throughout its life including planning, design, construction, acquisition, operation, maintenance, rehabilitation and disposal costs.

**“Replacement Value”** is the cost of replacing the service potential of a particular asset, by reference to some measure of capacity, with an appropriate modern equivalent asset. This includes disposal costs.

**“Residual Value”** is the estimated amount that the Council would obtain from the disposal of an asset, after deducting the estimated costs of disposal, if the asset were already of the age and in the condition expected at the end of its useful life.

**“Useful Life”** is the period over which an asset is expected to be available for use.

### **4. Principles**

The following key principles will define Council's approach to asset management:

1. Assets exist to support the delivery of services
2. Managers and staff are the responsible custodians for Council assets assigned to their respective operational areas, including the efficient use of those assets
3. Asset Management decisions are integrated with Strategic Planning.
4. Asset Planning decisions are based on an evaluation of alternatives which consider life cycles, costs, benefits and risks of ownership.
5. Systems are developed to provide accountability for asset conditions, usage and performance.
6. An effective internal financial control structure is established.
7. Council will maintain Asset Management Plans to identify future asset management requirements within the context of a Long Term Financial Framework
8. Asset renewal requirements will be separately identified from the provision of new assets and will undergo a separate annual approval process by Council.

## ***Asset Management Policy***

9. Council recognises the need to maintain its asset base and will target an annual asset sustainability ratio in the range of 85 - 115% with an average (over the ten year span of the Long Term Financial Plan) of 100%
10. Council's Asset Management Policy will be implemented in accordance with Council's Asset Accounting Policy and Australian Accounting Standards.

### **5. Availability/Accessibility**

This Policy will be available for inspection at Council's offices during normal business hours and on Council's website.

### **6. Document History**

This Policy shall be reviewed at least every three (3) years or more frequently if legislation or Council requires.
