

## WHS UVR AND INCLEMENT WEATHER PROCEDURE

WORK HEALTH & SAFETY (WHS)

Procedure reference	<b>WHS 06 - 09</b>
File reference	AR14/2362
Version number	3
Date adopted	02/12/2015
Next review date	2018
Applicable Legislation/References	SA Work Health & Safety Act 2012 SA Work Health & Safety Regulations 2012 General Disposal Schedule 20 for Local Govt WorkCover SA Performance Standards for Self-Insurers

\_\_\_\_\_  
**Chief Executive Officer (CEO)**

**Date**    /    / **2015**

\_\_\_\_\_  
**Chairperson, WHS Committee**

**Date**    /    / **2015**

**Date of WHS Meeting Procedure Adopted – 02 / 12 / 2015**

### 1. OVERVIEW

Coorong District Council as part of its commitment under its Hazardous Work Policy, recognise its obligation to manage risks relating to exposure to ultraviolet radiation (UVR) and inclement weather conditions.

This procedure is to be read in conjunction with any Enterprise Bargaining Agreement or organisational procedures which outline specific requirements for the standby and stand down provisions due to weather conditions.

This procedure aims to:

- Demonstrate compliance with legislation.
- Reduce the risk of UVR exposure and inclement weather conditions on workers' health and safety.
- Provide systems of work to identify hazardous conditions and manage risks arising from UVR exposure and inclement weather conditions.

**WHS UVR AND INCLEMENT WEATHER PROCEDURE**

Procedure reference	WHS 06 - 09
File reference	AR14/2362
Version number	3

**2. CORE COMPONENTS**

The core components of this procedure aim to ensure:

- The identification of reasonably foreseeable hazards associated with UVR and exposure to inclement weather conditions.
- Risk assessments are conducted for work tasks where exposure to UVR and inclement weather may present a risk.
- Appropriate controls for UVR exposure and inclement weather are identified, implemented and monitored.
- Workers who are exposed to UVR and inclement weather conditions through work outdoors are provided with appropriate training and facilities.
- Records are maintained.

**3. DEFINITIONS**

ALARP	As low as reasonably practicable
Approved clothing for (UVR) exposure	Is required to meet the requirements outlined in AS/NZS 4399:1996 Sun Protective Clothing – Evaluation and Classification.
Approved safety glasses	As in AS/NZS 1337.1 2010: Personal Eye Protection – Eye and Face Protectors for Occupational Applications.
Approved sunglasses	As in AS/NZS 1067: 2003 Sunglasses and Fashion Spectacles.
BOM	Bureau of Meteorology
Safe Work Instructions (SWI)	SWIs are written instructions for tasks involving recognised hazards and have relevance to departmental tasks and activities. They outline the required method of undertaking a task whilst emphasising ways to minimise any risk of harm. Other similar phrases used are: Task Risk Assessment (TRA), Plant Risk Assessment, Manual Handling Risk Assessment, Hazardous Substances Risk Assessment, Safe Operating Procedures (SOPs), Safe Work Procedures SWPs) Safety Data Sheets (SDSs).
Heat strain	Heat strain can arise from working in high temperatures, exposure to high thermal radiation or high levels of humidity. Immediate assistance should be provided if any worker experiences any of the following symptoms of heat strain: dizziness, fatigue, headache, nausea, breathlessness, clammy skin or difficulty remaining alert.  [as explained in the COP: Managing the Work Environment and Facilities, December 2011, part 2.8]
Hypothermia	Hypothermia arises when a person gets an abnormally low body temperature as a result of exposure to cold environments. Immediate assistance should be provided if any worker shows any of the following warning signs of hypothermia: <ul style="list-style-type: none"> <li>• Numbness in hands or fingers</li> </ul>

# WHS UVR AND INCLEMENT WEATHER PROCEDURE

Procedure reference	WHS 06 - 09
File reference	AR14/2362
Version number	3

	<ul style="list-style-type: none"> <li>• Uncontrolled shivering.</li> <li>• Loss of fine motor skills (particularly in hands – workers may have trouble with buttons, laces, zips).</li> <li>• Slurred speech and difficulty thinking clearly.</li> <li>• Irrational behaviour – sometimes a person can even begin to discard clothing.</li> </ul> <p>[as explained in the COP: Managing the Work Environment and Facilities, December 2011, part 2.8]</p>
Inclement weather	Is extreme weather conditions, such as high ultraviolet radiation, temperature (hot and cold), high humidity, heavy rain, gale force wind, hail, electrical storm or fog.
Photosensitisers	Are substances that when inhaled, ingested or contact the skin cause abnormally high sensitivity of the skin and eyes to UV radiation, causing the skin to burn more easily and increasing the risk of skin cancer. Photosensitisers include coal tar and its derivatives (e.g. pitch and creosote). [as per: Skin Cancer and Outdoor Work – A Guide for Employers, pg 10-11]
UV (Ultraviolet) Index	<p>Is a simple and informative way of describing the daily danger of solar UVR radiation intensity, as issued by the Bureau of Meteorology.</p> <p>1 – 2 = Low 3 – 5 = Moderate 6 – 7 = High 8 – 10 = Very High 11 upwards = Extreme</p> <p>Link to daily UVR readings <a href="http://www.bom.gov.au/sa/forecasts/adelaide.shtml">http://www.bom.gov.au/sa/forecasts/adelaide.shtml</a></p> <p>Exposure to UVR index levels of 3 or above can contribute to skin cancer and eye cataracts. During the peak UVR period on a summer day (between 10am and 2pm, or 11am to 3pm where there is daylight saving), unprotected skin can burn within 12 minutes. Permanent damage can occur after 120 minutes.</p>
Ultraviolet Radiation (UVR)	Understanding solar UVR is vital for understanding the sun protection control measures recommended. UVR is part of the electromagnetic spectrum emitted by the sun. It can be divided into three types: UVA, UVB and UVC. While all UVC and most UVB radiation is absorbed by the atmosphere, all UVA and about 10% of UVB radiation does reach the earth's surface. Both UVA and UVB are known causes of skin cancer. [as per: Skin Cancer & Outdoor Work – A Guide for Employers, pg 7]

# WHS UVR AND INCLEMENT WEATHER PROCEDURE

Procedure reference	WHS 06 - 09
File reference	AR14/2362
Version number	3

## 4. PROCEDURE

4.1 The Leadership Team will make sure that:

- a) There are systems in place for the training of Department Directors/Managers and Coordinators and Team Leaders whose workers work outdoors, in the requirements of this procedure.
- b) Department Directors/Managers, Coordinators and Team Leaders have access to relevant information to undertake the risk management process e.g. access to current BOM information, latest information related to PPE.

4.2 Risk assessment

4.2.1 Risk assessments for tasks are documented and include:

- a) Worker exposure to UVR.
- b) The range of weather conditions that may prevail.

4.2.2 Form a team to undertake risk assessments:

- a) Consisting of a competent person to lead the risk assessment, workers who are involved in the activity to be assessed, a HSR (where one exists), the Manager or Coordinator and other stakeholders or experts, where relevant.
- b) Generic risk assessments may be done proactively to identify controls to put in work instructions/operational procedures.
- c) Where generic risk assessments are not available risk assessments will need to be done immediately prior to a work activity.
- d) Each work situation should be assessed individually as the risk varies, e.g. horticultural workers, construction crews, depot workers, parking inspectors etc.

4.2.3 The following factors related to UVR and weather conditions need to be considered in any risk assessment:

- a) Weather conditions (including air temperature, humidity, UVR rating, wind, rain, fog).
- b) The nature of the task including duration, intensity of manual work and number of workers.
- c) Time of day and time of year that work is scheduled.
- d) Environment/ground surface (e.g. shade, concrete, grass, asphalt).
- e) Radiant or reflected heat from task.
- f) Photosensitisers associated with the task.
- g) The health, fitness and acclimatisation of individual workers including those returning from extended leave.
- h) Clothing of workers (considering UVR protection, air circulation, or rain/wind protection as applicable).
- i) Other factors as applicable.

# WHS UVR AND INCLEMENT WEATHER PROCEDURE

Procedure reference	WHS 06 - 09
File reference	AR14/2362
Version number	3

4.2.4 The risk assessment should clearly indicate what control measures are to be used, in accordance with step 4.4 below.

4.3 Identified risks are to be managed in accordance with Council's relevant procedures, including eliminating risks so far as is reasonably practicable to do so.

## 4.4 Risk Control

4.4.1 Where it is not reasonably practicable to eliminate identified risks, risks are to be minimised in so far as is reasonably practicable in accordance with the hierarchy of controls.

### 4.4.2 General controls

- a) Controls will be selected to reduce any identified risk to as low as is reasonably practicable. A combination of control measures may be required.
- b) Proposed controls will be selected in consultation with workers or their representatives.
- c) Controls can include, but are not limited to:
  - Rescheduling / reorganising tasks.
  - Modifying the physical aspects of the task. (for example mechanical instead of manual labour).
  - Alerting the task location.
  - Provision of shade or shelter.
  - Access to cool drinking water and Team Leaders checking that workers are drinking water regularly.
  - Access to air-conditioning (structure or vehicle).
  - Additional rest breaks.
  - Job rotation.
  - Appropriate personal protective clothing e.g. breathable and/or cooling safety vests, wind resistant and/or waterproof clothing, UVR protective clothing.
  - Cessation of work.

### 4.4.3 Specific control – outdoor work when UV index level reaches 3 or above:

- a) Personal Protective Clothing – workers are required to wear:
  - A broad brimmed hat which should have a brim of at least 7.5cm, or legionnaire's style cap which protects the neck and ears and/or bucket hat which has a deep crown, sits low on the head and has an angled brim of at least 6cm.
  - Approved sun and/or safety sunglasses.
  - Long trousers and long sleeved collared shirt, providing ultraviolet protection and which permits bodily evaporative cooling.
  - Sunscreen 30+ Sun Protection Factor (SPF) – applied at least 15 minutes prior to exposure to the sun and every 2 hours thereafter to skin which

# WHS UVR AND INCLEMENT WEATHER PROCEDURE

Procedure reference	WHS 06 - 09
File reference	AR14/2362
Version number	3

remains exposed after taking the above precautions, pay particular attention to the lips, ears, nose and neck.

- b) Workers are to have access to cool drinking water.

NOTE: Appendix 1 contains information re SunSmart UV Alert.

#### 4.4.4 Specific control – Hot temperature indoors

- a) Workers are required to wear approved clothing which also permits bodily evaporative cooling and footwear appropriate for the task.
- b) Workers are to have access to cool drinking water.
- c) The work environment should be provided with air-conditioning or adequate ventilation (natural or mechanical).

#### 4.4.5 Cold/cool/wet weather outdoors

- a) Workers are required to wear appropriate approved clothing and footwear for the task being undertaken, incorporating cold and wet weather protection which also permits bodily evaporative cooling.
- b) Workers should have access to shelter.

#### 4.4.6 Cold/cool weather indoors

- a) Workers are required to wear appropriate approved clothing and footwear for the task being undertaken, incorporating cold weather protection which also permits bodily evaporative cooling.
- b) The work environment should be provided with heating where reasonably practicable.

#### 4.4.7 Each person involved in the task will sign their acknowledgement of the Risk Assessment/TRA prior to work commencing.

#### 4.4.8 Inform affected persons about the control measures selected or corrective actions implemented as a result of the hazard identification and risk assessment process for UVR and inclement weather. Department meeting minutes and/or Task Risk Assessments (TRAs) (where relevant) should demonstrate that this has occurred.

#### 4.4.9 Identify any new hazards that may have been introduced by the selected control methods by:

- a) Monitoring and evaluating controls for effectiveness (see 4.10 below).
- b) Recommencing the risk assessment process, outlined at section 4.2.2 above, if:
  - New hazards are identified.
  - The measure does not control the risk it was implemented to control so far as is reasonably practicable.
  - A change at the workplace has been made that is likely to give rise to a new or different risk to health or safety that may not be effectively controlled.
  - The results of consultation indicate that a review is necessary or a health and safety representative request a review.

# WHS UVR AND INCLEMENT WEATHER PROCEDURE

Procedure reference	WHS 06 - 09
File reference	AR14/2362
Version number	3

- c) Communicating the outcomes of the risk assessment process within the department or work group and to the WHS committee, as required.
- d) Retaining completed Risk Assessments/TRAs.

## 4.5 Consultation

- 4.5.1 The department Director/Manager should consult and coordinate activities with other PCBUs who are undertaking outdoor work, so far as is reasonably practicable, if their duty of care overlaps.
- 4.5.2 The Director/Manager or Coordinator may need to consult with the Team Leader, in order to select appropriate controls.

## 4.6 Additional controls

- 4.6.1 Where conditions or circumstance exist outside of the generic risk assessments conducted for UVR exposure and inclement weather, (e.g. an emergency call-out during a storm or maintenance of essential services during extremes of heat or cold etc.) a Task Risk Assessment (TRA) should be conducted or modifications made to the generic risk assessment in consultation with workers and their representatives, before work starts in that situation.
- 4.6.2 Before work commences the Manager/Coordinator authorising the work, should check the UV index and weather conditions forecast to determine if:
  - a) The UV index range is 3 or higher (see <http://www.bom.gov.au/sa/forecasts/map.shtml>)
  - b) The BOM forecasts and current weather conditions such as heavy rain, gale force winds or electrical storms or extreme temperature or humidity, see (<http://www.bom.gov.au/sa/forecasts/map.shtml>) (<http://www.bom.gov.au/sa/observations/saall.shtml>)

NOTE: Appendix 1 contains information re SunSmart UV Alert

- 4.6.3 The Manager or Coordinator should make sure that workers are instructed in the agreed controls for UVR and inclement weather conditions and that the agreed controls are to be implemented.

## 4.7 Cessation of work due to inclement weather

- 4.7.1 Where the UV index is above 3 or inclement weather conditions exist and controls cannot be implemented to eliminate, so far as is reasonably practicable, or minimise risks (to ALARP), the task should be suspended until controls can be implemented or the inclement weather has passed.
- 4.7.2 The Manager or Coordinator should determine if and when work on the task should be suspended having regard to:
  - a) The risks posed by UVR exposure or inclement weather.
  - b) Council's UVR and inclement weather risk assessment/s.
  - c) Enterprise Agreements, and
  - d) Other organisational procedure/s.

# WHS UVR AND INCLEMENT WEATHER PROCEDURE

Procedure reference	WHS 06 - 09
File reference	AR14/2362
Version number	3

4.7.3 Where work is to be suspended for such a reason, and workers are unable to complete other work, they should hold themselves available for duty until otherwise discharged by the Manager or Coordinator or other nominated person.

## 4.8 Skin Checks

4.8.1 The Managers/Coordinators and WHS Officer should make sure workers are provided with information encouraging self examination of workers own skin for skin cancer and the support services available, as relevant. Annually the Council will provide workers the opportunity to attend a skin cancer appointment check with a doctor at a designated time and date. Additional appointments required will be funded by the Council.

## 4.9 Incidents involving outdoor work

4.9.1 First aid assistance should be provided to any worker who experiences any of the following:

a) Symptoms of heat strain:

- Dizziness,
- Fatigue,
- Headache,
- Nausea,
- Breathlessness,
- Clammy skin, or
- Difficulty remaining alert.

b) Warning signs of hypothermia:

- Numbness in hands or fingers,
- Uncontrolled shivering,
- Loss of fine motor skills (particularly in hands – workers may have trouble with buttons, laces, zips),
- Slurred speech and difficulty thinking clearly,
- Irrational behaviours – sometimes a person will even begin to discard clothing.

4.9.2 If a notifiable incident occurs that involves outdoor work, namely

- The death of a person, or
- A serious injury or illness of a person, or
- A dangerous incident

A report must be made by the Human Services Coordinator as follows;

a) SafeWork SA:

# WHS UVR AND INCLEMENT WEATHER PROCEDURE

Procedure reference	WHS 06 - 09
File reference	AR14/2362
Version number	3

- Report immediately by the fastest available means. The report can be made by phone or in writing (such as by fax, email or other electronic means).
- If the notification is by phone this must be followed up in writing within 48 hours if SafeWork SA requests it.
- The 24 hour Emergency Telephone number is 1800 777 209.

4.9.3 The incident reporting and investigation procedure should be complied with, including the requirement that the site where the incident occurred is not disturbed until an inspector arrives at the site or any earlier time that an inspector directs.

## 4.10 Monitoring and evaluation

4.10.1 Department Managers and Coordinators should review any existing risk control measures related to UVR and inclement weather, using the same methods as the initial hazard identification process:

- a) When the control measure does not minimise the risk so far as is reasonably practicable.
- b) Before a change at the workplace that is likely to give rise to a new or different health and safety risk that the control measure may not effectively control.
- c) If a new hazard or risk is identified.
- d) If the results of consultation indicate that a review is necessary or a health and safety representative requests a review.

4.10.2 The WHS Committee should monitor issues related to outdoor work during its meetings. A report should be presented to the Leadership Team listing outstanding items requiring their direction of enforcement.

4.10.3 The Leadership Team will;

- a) Review hazard and incident statistics, audit results, legislative changes and other information relating to the UVR and inclement weather process and direct action when required. Minutes should record outcomes of discussion and actions undertaken.
- b) Include the UVR and Inclement Weather Procedure as part of the ongoing Management Review Process and report the findings of internal audits into the UVR and Inclement Weather Procedure, as relevant.
- c) Set, monitor and review objectives, targets and performance indicators for any UVR and inclement weather process as relevant.

## 5. TRAINING

5.1 Coorong District Council Training Needs Analysis will identify the training needs of workers undertaking outdoor work, including having regard to:

- 5.1.1 The nature of the work carried out by the worker;
- 5.1.2 The nature of any risks associated with the work;
- 5.1.3 The control measures implemented.

5.2 The following types of training should be considered for inclusion on the TNA:

# WHS UVR AND INCLEMENT WEATHER PROCEDURE

Procedure reference	WHS 06 - 09
File reference	AR14/2362
Version number	3

- 5.2.1 Induction training – relevant workers (including contractors), should have Council’s requirements for outdoor work explained to them during the induction process.
- 5.2.2 Risk assessment – workers undertaking risk assessments should have specific training that includes risks related to UVR and inclement weather and associated control measures.
- 5.2.3 Work specific training – so that workers carrying out outdoor work are trained on any risks and the control measures required as appropriate, including exposure to UVR and inclement weather conditions.
- 5.2.4 Coordinator (Supervisor) and Management Training – so that safety issues related to UVR and inclement weather conditions are appropriately managed at the workplace.
- 5.2.5 First aid training – so that first aid officers, Directors, Managers, Coordinators, Team Leaders and Workers know what to do, including in the event of symptoms related to heat strain or hypothermia.
- 5.2.6 Ongoing or refresher training – so that training on WHS matters is repeated as appropriate on a periodic basis.
- 5.3 Directors, Managers, Coordinators, HSRs should be trained in the risk assessment process.

## 6. RECORDS

The following records should be maintained:

- 6.1 Completed UVR exposure and inclement weather risk assessments.
- 6.2 Training records:  
Records must be retained in line with the current version of GDS20.

## 7. RESPONSIBILITIES

- 7.1 Coorong District Council Leadership Team is accountable for:
  - 7.1.1 Approving reasonably practicable budgetary expenditure necessary to implement this procedure.
  - 7.1.2 WHS legislative compliance.
  - 7.1.3 Checking that reasonably foreseeable hazards associated with UVR and inclement weather are identified, so far as is reasonably practicable, within each department, assessed and controlled so far as is reasonably practicable, when elimination is not reasonably practicable.
  - 7.1.4 Checking that Managers, Coordinators and Team Leaders have been provided with appropriate training to ensure they can conduct risk assessments and implement relevant control measures.
  - 7.1.5 Checking that workers who are required to work outdoors have been provided with training in this procedure within the limits of their responsibility.
  - 7.1.6 Providing, where reasonably practicable, vehicles and mobile plant that are fitted with air-conditioning.

# WHS UVR AND INCLEMENT WEATHER PROCEDURE

Procedure reference	WHS 06 - 09
File reference	AR14/2362
Version number	3

- 7.1.7 Providing appropriate personal protective equipment or clothing.
  - 7.1.8 Providing (or confirming where necessary that other parties with a shared duty to Council workers will provide) cool drinking water for workers.
  - 7.1.9 Consulting with other Persons Conducting a Business or Undertaking (PBCUs), so far as is reasonably practicable, if their duty of care overlaps.
  - 7.1.10 Monitoring the Hazard Register and enforcing close out of items when required.
  - 7.1.11 Reviewing the effectiveness of the UVR and inclement weather process.
  - 7.1.12 Including a review of UVR and inclement weather management in the Management Review Process.
- 7.2 Managers, Coordinators and Team Leaders (when delegated to a workgroup) are accountable for:
- 7.2.1 Monitoring weather conditions.
  - 7.2.2 Checking that the hazards associated with UVR and inclement weather have been risk assessed for tasks undertaken by workers within their departments and eliminated where possible.
  - 7.2.3 Where elimination is not possible checking that controls have been selected from the Hierarchy of Control, in consultation with workers or their representatives or other stakeholders.
  - 7.2.4 Implementing the identified controls and evaluating and reviewing them for effectiveness.
  - 7.2.5 Communicating the outcomes of risk assessments within the department or work groups and across the council as required.
  - 7.2.6 Reviewing and revising risk assessments.
  - 7.2.7 Making sure control measures have been implemented in accordance with the risk assessment.
  - 7.2.8 Making sure information is provided to workers regarding UVR and inclement weather protection requirements before they commence work outdoors.
  - 7.2.9 Advising workers and other persons of final outcomes in a timely manner after any decision has been made to suspend work.
  - 7.2.10 Retaining records as required.
  - 7.2.11 Seeking expert advice when a need is identified.
  - 7.2.12 Providing required reports to the WHS Committee or Leadership Team.
- 7.3 The Human Services Coordinator/WHS Officer is accountable for:
- 7.3.1 Monitoring training records.
  - 7.3.2 Providing assistance with completing UVR and inclement weather risk assessments.
  - 7.3.3 Providing workers with information related to encouraging self-examination of their own skin for skin cancer and support services.

# WHS UVR AND INCLEMENT WEATHER PROCEDURE

Procedure reference	WHS 06 - 09
File reference	AR14/2362
Version number	3

7.3.4 Maintaining legislative currency of procedures and system in relation to UVR and inclement weather.

7.3.5 Initiating audit and review activities as required.

7.4 Workers are accountable for:

7.4.1 Attending and participating in training when required.

7.4.2 Participating in UVR and inclement weather risk assessments as required.

7.4.3 Taking appropriate regular rest breaks as directed by the Coordinator/Team Leader.

7.4.4 Maintaining hydration by taking regular small drinks in hot weather.

7.4.5 Wearing and maintaining appropriate personal protective equipment or clothing as required.

7.4.6 Applying and re-applying 30+ Sun Protection Factor water resistant sunscreen as required.

7.4.7 Abiding by any Manager or Coordinator direction for the conduct of work activities (e.g. suspending work during extreme weather conditions which may be detrimental to their health, when advised to by their Manager/Coordinator).

7.4.8 Reporting any hazardous situation or safety problems immediately to their Manager, Coordinator or Team Leader.

7.5 The WHS Committee is accountable for:

7.5.1 Facilitating co-operation between Leadership/Management and Workers in matters relating to UVR in inclement weather.

7.5.2 Monitoring the Hazard Register and referring issues to the Council Leadership Team that require management direction or enforcement.

7.6 Health and safety representatives may:

7.6.1 Facilitate consultation between department Managers/Coordinator and workers in relation to WHS issues that affect the workgroup that they represent.

7.6.2 Assist in the resolution of WHS issues.

7.6.3 Request a review of a control measure in the circumstances outlined in the WHS Hazard Management Procedure.

## 8. REVIEW

8.1 The UVR and Inclement Weather Procedure should be reviewed by the Leadership Team, in consultation with workers and their representatives, every three (3) years or more frequently if legislation or Council requirements change. This may include a review of the following:

8.1.1 Feedback from Directors, Managers, Coordinators, Workers, HSRs, contractors, WHS committee members or others related to moderate and above UV radiation, thermal comfort and other inclement weather issues.

8.1.2 Legislative compliance.

**WHS UVR AND INCLEMENT WEATHER PROCEDURE**

Procedure reference	WHS 06 - 09
File reference	AR14/2362
Version number	3

8.1.3 Compliance issues relating to the requirements of the Performance Standards for Self-Insurers of LGAWCS.

8.1.4 Internal or external audit findings relating to UVR and inclement weather.

8.1.6 Other relevant information

8.2 The Human Services Coordinator/WHS Officer should report on the outcomes of such reviews to the WHS Committee and Leadership Team.

## APPENDIX 1

### SunSmart UV Alert

The SunSmart UV Alert is a tool you can use to protect yourself from UV radiation. It tells you the time during the day that you need to be SunSmart.

The Alert is issued by the Bureau of Meteorology when the UV index is forecast to reach 3 or above. At that level, it can damage your skin and lead to skin cancer.

The Alert is reported in the weather page of all Australian daily newspapers, on the Bureau of Meteorology website, and on some radio and mobile weather forecasts.

You can also check the Alert for cities and towns across Australia with the widget on the home page. If you have your own website you can download this widget free of charge.

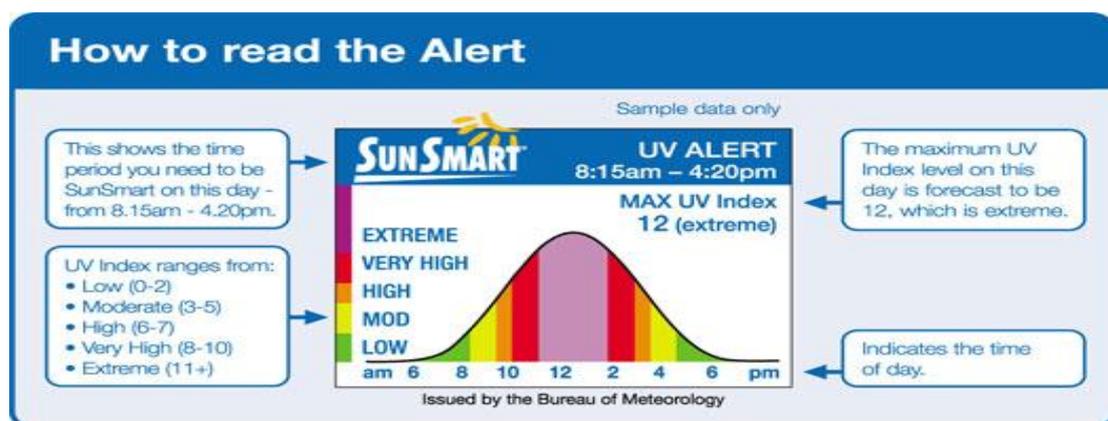

For smart phone users, the Cancer Council of Australia free SunSmart app is a great way to check the UV Alert when you are out and about. Iphone users can download it at the iTunes Store, Android users at Google Play and Samsung users at Samsung Apps.

So whether you are at work, home or on the move, you can easily and quickly check the times of the day.

Look or listen for the Alert when you are:

- Planning or participating in an outdoor activity or event.
- Undertaking recreational activities such as running, swimming, cycling or team sports.
- Watching a spectator sport, such as tennis or cricket.
- An outdoor worker, or have responsibility for outdoor workers, or
- Responsible for young children and their outdoor activities.

If any Alert has been issued, you need to protect yourself during the times indicated.

For more information

- UV Alert Brochure
- Bureau of Meteorology UV Index
- Australian Radiation Protection and Nuclear Safety Agency (ARPANSA)
